

Shield Docs Platform

Security . Productivity . Intelligence

With the growing adoption of cloud, BYOD and mobility, increases in data generation and the expansion of enterprise boundaries present opportunities for organisations to reduce costs, improve efficiencies and gain data driven intelligence. However, these infrastructure shifts bring increased risks around security and privacy.

Shield Docs is a **trusted online platform for securely sharing sensitive documents in the cloud.**

Shield Docs has been designed to help organisations find the “sweet spot” between security, productivity and governance by providing layered security with enhanced productivity and intelligence features to facilitate safer, smarter and more efficient business in the cloud.

The Shield Docs platform comprises a modular product range to suit your business needs with flexible pricing options and a suite of customised solutions tailored to Deals, Boards, Tenders, Property, Start-ups and Procurement to name a few.

Why customers use Shield Docs:

- To facilitate trust by providing a safe environment to conduct business
- To reduce risk through secure sharing and storage of documents
- To improve productivity with intuitive process automation
- For a negotiation ‘edge’, using analytics and artificial intelligence
- To ensure integrity of information, processes and participants with “always-on” audit
- To streamline corporate governance and compliance with built in workflows

The Shield Docs Difference

SIMPLE	SECURE	SCALABLE	SMART
